

2026 Annual Meeting

What a great turnout at our Annual Membership Meeting! Thank you all for taking the time to connect with your fellow members and us. Seeing so many dedicated people together reminded us why Manville WSC is such a successful corporation. Your participation and support are vital to our success, and we were delighted to share our accomplishments with you.

Manville WSC Water Meter Policy

Having one meter serving more than one service connection is a violation of Manville Water's Tariff and is prohibited by TCEQ regulations.

One meter is required for each residential, commercial or industrial service connection.

Per state regulations, a public water system must provide accurate metering devices at each service connection for the accumulation of water usage data.

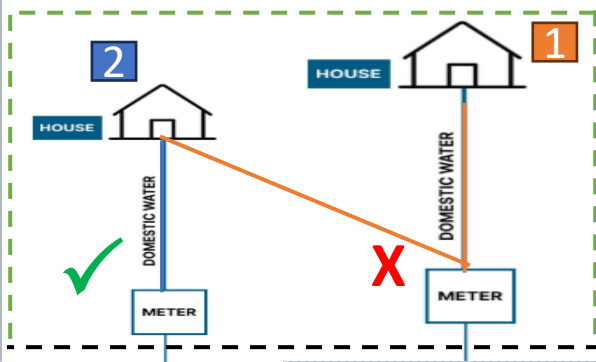

A connection is defined as a single-family residential unit or each commercial or industrial establishment to which the system supplies water.

One meter per residence or business

Un medidor por residencia o negocio

Multiple connections are not allowed

No se permiten múltiples conexiones

If you are a member in violation of this policy, please contact our development department to conduct a compliance evaluation.

Did you know? Less than 1% of all the water on Earth can be used by people. That's because most of the Earth's surface water is permanently frozen or salty. As our population grows, more and more people are using up this limited resource, so it's important that we all work together to use our water wisely and not waste it.

Water-Saving Tips

Rain Barrels: Capture free rainwater for garden use.

Fix Leaks: Repair dripping faucets and toilets; a small leak can waste hundreds of gallons daily.

Turn Off the Tap: Turn off the water while brushing teeth, shaving, or hand-washing dishes.

Smart Landscaping: Use native or adapted grasses/plants that require less water.

Test your Water IQ

How many gallons of water does each activity use on average?

1. A 10-minute shower
2. Washing one load of clothes
3. Flushing a toilet
4. Applying 1 inch of water across a 1,000 square foot lawn
5. Running a dishwasher
6. Brushing your teeth with the water running for 2 minutes
7. Playing with the garden hose for 15 minutes
8. Allowing a faucet to drip for one day

Answers: 1) 50; 2) 43; 3) 3; 4) 623; 5) 10; 6) 4; 7) 75; 8) 25
